Duolingo

2013 - Present

Senior Product Designer

Led design for various features and projects at Duolingo. Involved in visual design, prototyping, front-end development, product roadmapping, A/B test analysis, and more. Mentored designers, formalized design processes, and helped grow the team from 3 to 9 designers.

Duolingo for Schools

As Design Lead, I helped conceive the Duolingo for Schools product which now has over 300,000 registered classrooms around the world. Led all product design and research initiatives. Contributed significantly to the front-end development of the platform.

Duolingo.com

Led product design for numerous features on Duolingo.com to improve user retention, registration, and other core metrics.

MAYA Design

2012 - 2013

Interaction Designer

Collaborated with clients and teams throughout all phases of the human-centered design process. Involvement included conducting user interviews, affinity diagramming, prototyping, and visual design.
